

**Greenhouse Gas Abatement and Energy Efficiency, Future of
Coal, Future of Electricity Generation, Climate Change and
Climate Gap in a Carbon-Constrained World**

**Praveen Amar, NESCAUM
Moderator**

pamar@nescaum.org

MIT-NESCAUM Endicott House Symposium
New Directions in Energy Policy and Impacts
on Air quality
August 10-12, 2009

We Have Seven Distinguished Speakers

- Philip Farese, Mckinsey & Co, GHG Abatement and the Role of Energy Efficiency
- Dave Rutledge, Caltech, Coal as a Resource and Climate Change
- Joe Strakey, U.S. DOE-NETL, Energy Department's Perspective on CCS
- Howard Herzog, MIT, The CCS Challenge: From Megatonnes to Gigatonnes

Seven Distinguished Speakers

- Norm Shilling, General Electric, An Industry perspective on Coal and CCS
- Sam Napolitano, U.S. Environmental Protection Agency, An Outlook for Electric Power Generation in a Lower-Carbon Economy
- Manuel Pastor, University of Southern California, The Climate Gap: Race, Income, and Climate Change
